*Radiologist—*Dr. D. L. GREIG.

DUDLEY AUKLAND, *Clerk to the Visiting Committee.*

# SURREY COUNTY MENTAL HOSPITALS

---

## Annual Report of the Visiting Committee

(Pursuant to the Lunacy Act, 1890, Sec. 190.)

*Presented to the County Council at their meeting held on the 30th  
day of November, 1937.*

---

*To the County Council of Surrey.*

The Visiting Committee submit their Report for the year ended 31st December, 1936, together with the audited accounts to 31st March, 1937.

At the meeting held on the 26th May, Mr. E. A. Medus was re-elected Chairman, and Mr. W. J. H. Briggs was re-elected Vice-Chairman.

Five meetings of the Committee and 28 meetings of the Standing Sub-Committees were held during the year, and frequent inspections of the buildings and grounds of the two Hospitals were carried out in accordance with the provisions of the Statute.

The normal accommodation in the two Hospitals at the date of presentation of this Report is as follows :—

<i>Brookwood.</i>	<i>Netherne.</i>	<i>Total.</i>
1,606 Beds.	1,480 Beds.	3,086 Beds.

On the 1st January, 1937, there were 40 patients chargeable to out-County Authorities, 97 private patients, and 67 Service patients. The total number of patients in the two Institutions was 3,078.

The following tables show the numerical changes in patients at both Hospitals during the year :—

### BROOKWOOD HOSPITAL.

Remaining, Dec. 31, 1935.		Since admitted.		Discharged recovered.		Removed, etc.		Died.		Remaining, Dec. 31, 1936.	
M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
615	953	136	178	27	39	36	74	42	71	646	947
1568		314		66		110		113		1593	

### NETHERNE HOSPITAL.

Remaining, Dec. 31, 1935.		Since admitted.		Discharged recovered.		Removed, etc.		Died.		Remaining, Dec. 31, 1936.	
M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
552	907	157	276	29	80	78	108	50	62	552	933
1459		433		109		186		112		1485	

The following table shows the number of deaths occurring at the Mental Hospitals during the past two years as compared with the average number of patients in residence :—

	1935.		1936.	
	No. of Deaths.	Percentage of average No. of Patients.	No. of Deaths.	Percentage of average No. of Patients.
Brookwood ..	87	5.5	113	7.16
Netherne ..	87	6.1	112	7.50

The total number of recovered cases was 175 as compared with 212 in 1935.

The buildings and machinery and other contents have been maintained in an efficient state of repair.

The following items of expenditure need no comment :—

	<i>Brookwood.</i>			<i>Netherne.</i>		
	£	s.	d.	£	s.	d.
Ordinary Repairs .. ..	7,560	11	6	7,371	18	2
Additions, alterations and improvements under £400	210	12	10	60	3	11
New buildings (voted by County Council) ..	10,943	15	4	1,420	2	9

Sums paid in respect of superannuation allowances during the financial year ended 31st March last, and in the previous year were as follows :—

<i>Brookwood.</i>		<i>Netherne.</i>	
1936-37.	1935-36.	1936-37.	1935-36.
£6,470 12s. 1d.	£6,227 12s. 1d.	£4,066 10s. 2d.	£4,317 1s. 1d.

Commissioners of the Board of Control visited both Hospitals during the year, and their reports will be found on pages 25 and 29.

The Council will remember that they were informed of the serious shortage of accommodation for patients at both Hospitals, and that in November, 1936, and April of this year, they authorised sums totalling £82,000 upon the provision of a sick hospital, tuberculosis block, isolation block at Brookwood, which

when completed will provide an extra 120 beds and accommodation for the necessary staff. Work has been commenced on these extensions, and satisfactory progress has been maintained.

To alleviate the overcrowding at Brookwood, accommodation was found for 20 female patients at the Devon Mental Hospital, and a Reception Contract has been entered into with the Visiting Committee of that Hospital.

Your Committee informed the Council in July, 1936, of the probability of the necessity for the provision of a third mental hospital in the County.

A small portion of the Brookwood Hospital Estate was handed over to the Standing Joint Committee for police purposes.

The practice of Occupational Therapy had, up to the date of your Committee's last Annual Report, been carried out on a limited scale. There is no doubt whatever, that the patients have derived a considerable amount of benefit from this form of treatment, and in order to extend the work in this direction your Committee authorised the appointment of one male occupations officer and one female occupations officer at each hospital.

Dr. J. A. Lowry, Medical Superintendent at Brookwood, was normally due to retire on 13th March, 1937. In view of large building undertakings which are foreshadowed during the next few years, it was thought highly advantageous that this Officer's services should be retained. Dr. Lowry has stated his willingness to continue in the Council's service for a further minimum period of five years.

The average weekly cost of maintaining patients at the two Hospitals during the past financial year was approximately 22s. 6½d. per head. The average weekly charge for Surrey rate-aided patients was 21s. 7d.

Statements showing how the average cost at each Hospital was arrived at are printed on pages 12A and 12B.

At the date of this report the maintenance rate stands at 21s. 7d., which is considered sufficient to meet all practical needs for the remainder of the current financial year.

The following is a record of attendances of members for the year :—

Name.	Visiting Committee (5 meetings).		Sub-Committees (28 meetings).	
	Summoned.	Attended.	Summoned.	Attended.
Bacon ... ..	5	4	12	11

## APPENDIX I.

---

AUDIT DISTRICT No. 9.

SOUTHWOOD HOUSE,

LINDEN PARK,

TUNBRIDGE WELLS.

15th June, 1937.

*To the Chairman and Members of the  
County of Surrey.*

MY LORD, LADIES AND GENTLEMEN,

I have to report the completion of the audit of the accounts of the Visiting Committee of the Surrey County Mental Hospitals for the year ended at the 31st March, 1937.

Matters of detail affecting the accounts which do not merit recapitulation here were discussed with the Officers of the County Council, the successor to the Visiting Committee.

Every assistance was afforded by the Officers of the Mental Hospitals in elucidating points of detail and I wish to record my appreciation.

I am, my Lord, Ladies and Gentlemen,

Your obedient Servant,

E. H. V. WEIGALL,

*District Auditor.*

## APPENDIX II

*To the Visiting Committee of the Brookwood Hospital.*

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to present the 72nd Annual Report of the Medical Superintendent, together with the Statistical Tables for the year 1936.

The numerical changes in the patients during the year were as follows :—

	M.	F.	T.
Number of patients in Hospital on December			
31st, 1935... ..	615	953	1,568
Since admitted ... ..	136	178	314
Discharged recovered... ..	27	39	66
Removed ... ..	36	74	110
Died ... ..	42	71	113
Remaining on December, 1936 ... ..	646	947	1,593

*The Admissions.*—There were seven more admissions than in the previous year; 53 were voluntary, 6 were temporary, and 255 were certified patients.

The chief factors assigned in causation were: Heredity, 15 per cent.; Critical Periods, 15 per cent.; Senility, 15 per cent.; Epilepsy, 5 per cent.; Stress, 15 per cent.; Syphilis, 4.6 per cent.; and Alcohol, 2 per cent.

*The Discharges.*—66 patients were discharged as recovered, giving a recovery rate of 21.8 per cent., calculated on the direct admissions, a fall of 7 per cent. from the rate obtained in the previous year.

43 patients were discharged to the care of their friends.

20 female patients were “boarded out” under contract in the Devon Mental Hospital, Exminster, owing to the lack of accommodation here.

*The Deaths.*—113 patients died, the chief causes of death being Pneumonia, 37; Cardiac Disease, 19; Senility, 14; Nephritis, 10; Cancerous Growths, 9; Cerebral Hæmorrhage and Thrombosis, 6; General Paralysis, 4; Tuberculosis, 3. The death rate was only 7.2 per cent., but was, however, the highest for the past seven years, and was largely accounted for by an epidemic of Influenza and Pneumonia in the spring.

Of the 113 deaths, 56 were over the age of 65.

*General Health.*—Apart from the epidemic above mentioned, the general health of the patients was good, with a marked freedom from infectious diseases. Some anxiety, however, was caused by the fact that 6 male

patients developed tuberculosis, and that many patients recorded losses of weight during the year.

Dietary improvements have been made which, it is hoped, will increase the resistance of the patients to infection.

The demands on the nursing accommodation of the Hospital have been heavy, but plans have now been approved for building modern infirmary wards which should be in use within two years, and should enable us to give all sick cases every possible care and attention, without the difficulties at present encountered.

*Accidents and Inquests.*—10 female patients sustained fractures of bones, due to accidental causes. One nurse also sustained a fracture, and another nurse sustained a scalp wound and concussion as the result of an attack by a female patient.

Three inquests were held during the year, one on a male patient who died suddenly of Coronary Artery disease. He was feeding the swans on the canal bank at the time, and fell into the water, from which he was promptly removed by two other patients. A verdict of “death from natural causes” was returned.

The second case was that of a woman who died four days after admission. She was suffering from disease of the liver, and Luminal administered in therapeutic doses prior to admission was found to be the cause of death. The verdict was “death by misadventure, due to Luminal poisoning.” The case showed the danger of administering drugs of this type to patients suffering from some forms of undetected organic disease. The jury agreed that the drug was administered in proper doses, and that no blame could be attached to anyone.

In the third case, a male patient died from shock following impaction of food in the œsophagus. He was suffering from cardiac disease. A verdict of “accidental death” was returned.

All these cases were fully reported to you.

*Escapes.*—Six men and two women escaped during the year. All were returned within short periods except one man who remained at liberty for over fourteen days. He was afterwards re-certified, and came back to us again.

*Operations.*—Twelve major surgical operations were performed on patients, and three on members of the staff.

Dr. Jobson also performed three nose and throat operations.

*Visits.*—Two members of the Board of Control visited the Hospital on August 13th and 14th. Their report is appended.

Sir Hubert Bond and Mr. Kirkland also visited the Hospital on March 16th in connection with the selection of a site and preparation of plans for the new Infirmary Wards.

Dr. Abdy Collins, the Headquarters Inspector of the Ministry of Pensions, visited all the service patients on July 14th.

The North-Eastern and North-Western Guardians Committees also visited the Hospital during the year.

*Staff.*—Dr. Langdon-Down was appointed as Fourth Assistant Medical Officer on January 8th.

Miss A. E. Kelly, sister-tutor, resigned, and the vacancy was filled by the appointment of Miss L. D. Walker.

Our Chaplain, the Rev. D. W. Money, M.A., resigned on December 31st, owing to ill-health. He had been with us since April 1st, 1924. We have happy recollections of his service here, and of his kindness and devotion to duty.

I regret to report the death of Dr. R. N. B. McCord, the Deputy Medical Superintendent, on December 27th. He had been in your service since August 1st, 1920, and had been Deputy Medical Superintendent for the past twelve years. He was universally liked in the Hospital, and his death caused us great distress. You granted a gratuity to his widow.

Pensions were granted to five members of the staff.

A. C. Deekes, Tailor, after 28 years' service.

M. Dyke, Charge Nurse, after 30 years' service.

A. J. Hayward, Bootmaker, after 33 years' service.

O. M. Salmon, Charge Nurse, after 26 years' service.

W. H. Beminster, 1st grade Clerk, after 37 years' service.

The conduct of the staff has been good, and we are indebted to them for loyal and considerate service. I feel that the senior nurses and attendants are worthy of special mention, as they undoubtedly bear much of the responsibility of the actual care of the patients.

I am particularly grateful to my Medical colleagues, to Mr. Ekins, the Clerk and Steward, to the Matron and to the Head Attendant for their willing and able assistance in the administration of the Hospital.

The usual training and lectures were given to the nursing staff by the Medical Officers and the Sister-Tutor during the year, and 19 candidates out of a total of 34 obtained the Nursing Certificate of the Royal Medico-Psychological Association.

*Occupations and Amusements.*—These continue to form a large part of Hospital life, and are used regularly as a means of treatment for all patients.

Miss F. M. Owen has been appointed Occupations Officer for the female patients, and this department is steadily extending its usefulness under her enthusiastic direction.

*Works Department.*—Completed during 1936 :—

New Kitchen.  
Male and Female Visiting Rooms.  
Occupational Therapy Pavilion.  
Repairing Fire Escapes.  
Covered Way to Stores.  
Alteration to Printer's Shop.  
Cloakroom F.I.

In progress :—

Farm House at Cobbett's Farm.  
Alterations to Mortuary.  
Foul Linen Room at Laundry.

Contemplated :—

New Sick Hospital.  
6 pairs of Cottages for Staff.  
New Brush Room.  
Provision of additional Cloakrooms.  
Detached Pavilions for Male and Female sides.

It is with much thankfulness that I again take this opportunity to express my appreciation of the kindness which I have received from you, Mr. Chairman, and from all the members of the Committee.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

J. A. LOWRY, M.D.,

*Medical Superintendent.*

BROOKWOOD HOSPITAL.

ST. DUNSTAN'S,  
WOKING.

I beg to submit my report for the year 1936.

I held a Service for the R.C. Patients every week. The first Tuesday of the month Mass and Holy Communion and Devotions on the other days. I also paid ten special visits on other days to Patients who were sick and administered the Sacraments to them. Two deaths occurred among the R.C.'s.

Yours sincerely,

H. E. PLUMMER.

# APPENDIX III.

## NETHERNE HOSPITAL.

MR. CHAIRMAN, LADIES AND GENTLEMEN.

I have the honour to present the 28th Annual Report of the Medical Superintendent, with the statistical tables for the year 1936.

The following shows the numerical changes among the patients during the year :—

	<i>Male.</i>	<i>Female.</i>	<i>Total.</i>
Number of patients in Hospital 1st January,			
1936 ... ..	552	907	1,459
Admitted during the year ... ..	157	276	433
Discharged recovered... ..	29	80	109
„ relieved ... ..	24	61	85
„ not improved ... ..	11	23	34
Transferred ... ..	43	24	67
Died ... ..	50	62	112
Average number resident ... ..	564	933	1,497
Greatest number resident ... ..	582	951	1,533
Remaining on the books of Hospital,			
December 31st, 1936 ... ..	552	933	1,485

There were 26 more females at the end of 1936 than at the beginning of the year—the actual female accommodation is 890, so on December 31st, 1936, there was overcrowding to the extent of 43 on the female side.

*The Admissions.*—There were 433 admissions, an increase of 23 on the previous year—27 more males, and 4 fewer females. The increase in the number of male patients was caused by the admission of all the males from Kingston in the latter part of the year. Of the admissions, 109 were voluntary (M. 50, F. 59) and 18 were temporary (M. 5, F. 13). The chief ætiological factors were :—

Senility ... ..	24 per cent.
Insane Heredity ... ..	12 „
Stresses of various kinds ... ..	10 „
Adolescence ... ..	6 „
Critical Periods ... ..	9 „
Alcohol and Syphilis ... ..	2 „ each.
Childbirth ... ..	3 „

*The Discharges.*—These numbered 295, of which 109 (29 men and 80 women) were recoveries. The recovery rate calculated on the direct admissions was 26 per cent. (Males 20 per cent., Females 32 per cent.), compared with 35 per cent. in 1935. Many of the admissions were elderly patients, and in 104 of them senility was returned as an ætiological factor.

The general health of the patients has been good.

*The Deaths.*—These numbered 112—50 males and 62 females, which is a mortality rate of 7.4 per cent. calculated on the average number of patients resident. The main causes of death were :—

Broncho-pneumonia	...	...	...	16	per cent.	
Senile Decay	...	...	...	16	„	
Heart Disease	...	...	...	10	„	
Tuberculosis...	...	...	...	8	„	and
General Paralysis	...	...	...	5	„	

Three inquests were held during the year. The first was on a male patient who had an accident some months prior to admission, and the verdict was in accordance with medical evidence. The second and third were on a male and female patient respectively. The former cut his throat while on trial. The verdict in these two cases was one of suicide while of unsound mind.

*Escapes and Accidents.*—8 men and 9 women escaped during the year, but all, with the exception of two (one man and one woman) were brought back within a few hours. The two patients were away for 14 days, and so by law discharged.

Three men and 17 women received fractures as the results of accidents, but none was serious.

The Committee appointed Occupations Officers on the male and female sides last November. The Occupational Therapy is extending. Both men and women have a physical training class, and the men a gymnasium. Cricket matches between the patients here and those of other hospitals are very popular. In the summer months the 'bus takes a party of patients to the seaside weekly.

• Seven lady visitors came to see the patients regularly, usually once a week. Their visits and kindly interest are much appreciated.

*Staff.*—The conduct of the staff, with few exceptions, has been good. Lectures have been given by the Medical Officers and Sister Tutor. Six nurses and 11 attendants obtained their certificates in mental nursing

during the year. There still is great difficulty in obtaining female nurses to fill the vacancies caused by resignations for various reasons.

I regret to have to report the deaths of three senior members of the staff. Nurse Beatrice Jury died 19th October after an acute illness. Nurse Jury joined the staff in 1909, and for many years was in charge of the Admission Ward. Her untimely death was a great loss to the Hospital, as Nurse Jury was a devoted and kindly nurse, and greatly beloved by the patients and her fellow nurses.

Deputy Head Attendant W. E. Wright died on 20th June, after a long illness. He joined the staff in 1919, and after being Charge Attendant was promoted to the post he held at the time of his death. He was popular with the patients and his colleagues.

Mr. George A. Gunner, the Foreman Joiner, died suddenly on 27th January after 28 years' service. He was an expert craftsman, and his jovial personality is sadly missed.

*Visits.*—Two members of the Board of Control visited the Hospital on 24th and 25th August, 1936. Their report is appended. The Inspector of the Ministry of Pensions paid his annual visit to the private service patients.

Deputations from the Mid-Eastern, North-Eastern and South-Eastern Areas Public Assistance Committees also visited during the year.

Twenty-nine men and 40 women were seen at the Clinic at Kingston Hospital during the year.

*Works Department.*—

Calf Shelter.

Hot Water Service.

Heating installed in Assistant Medical Officer's house.

Heating installed in Medical Superintendent's house.

New Coal Bunker.

New Porch to Assistant Medical Officer's house.

New Carding Machine.

New Fire Alarm Battery.

Lawn Mower Grinding Attachment.

Welding Plant.

Drainage at Woodplace Farm.

I have to thank my medical colleagues and the officers for their assistance and loyal co-operation during the year.

In conclusion I wish to express my gratitude to the members of the Visiting Committee for their kindness and support in helping me to carry out my duties.

I have the honour to remain,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

(Signed) L. M. WEBBER.

## NETHERNE HOSPITAL.

## CHAPLAIN'S REPORT FOR 1936.

LADIES AND GENTLEMEN,

The momentous year 1936, featuring three reigns, has come to its end. The joys and the sorrows of our time have been most sympathetically reflected in the Church life of our people here. Throughout the year all the services have been maintained in Church and recreation hall without a break.

All sections of the Hospital have been visited regularly. Services have been held in the wards for those who, by reason of age and infirmity, could not attend the Church. In our cemetery here there were laid to rest fifteen members of the Church of England, *viz.*, 11 males and 4 females.

Members of our staff were presented for Confirmation at St. Katharine's Church, Merstham, on March 31st. There have been marriages within our ranks, and baptisms of children born on the Estate, at which I have officiated.

Two members of our staff were buried in Merstham Churchyard; William Edward Wright, a Deputy Head Attendant, a courteous and kindly man, and Nurse Jury, whose life of service ended in the Hospital after a serious operation. Their passing is deeply regretted. In both cases the staff formed a Guard of Honour, while the village Church was filled with their friends.

The offertories have been disposed of as follows: Mental After-Care Association, £8 15s. 1d.; South London Church Fund, £1 4s. 3d.; Various charities, 15s. 0d. All amounts are duly audited by the Steward.

May I place on record my grateful thanks to the Committee and the British Red Cross for the gift of books for the patients' library. Books are always in demand and are greatly appreciated.

I am most thankful for the continued help and interest of all members of the staff.

Yours faithfully,

(Signed) GEORGE AYLES-WATERS,

*Chaplain.*

NETHERNE HOSPITAL, COULSDON.

---

REPORT OF THE ROMAN CATHOLIC CHAPLAIN FOR 1936.

---

The number of Services held was 51, and about 260 patients received Holy Communion.

In all, there were 965 attendances; also several visits were paid to the wards and Holy Communion administered to sick patients.

Those in danger of death received the last rites of the Church. Five patients died.

I am very gratified to note the uplifting and consoling effects derived by the Catholic patients from the ministration of their religion.

In my opinion these beneficent results would be still more effective if a room could be set aside for them for use as a small chapel where they could retire at times for meditation and prayer.

(Signed) J. J. TYNDALL.

*R.C. Chaplain.*

## APPENDIX IV.

---

### REPORT OF COMMISSIONERS OF THE BOARD OF CONTROL.

---

SURREY COUNTY MENTAL HOSPITAL,

BROOKWOOD.

*7th August, 1936.*

Our visit to this Hospital has occupied the whole of yesterday and to-day. Dr. Lowry was away on his annual holiday, but we were accompanied throughout by Dr. McCord.

The Hospital is at present somewhat disorganised owing to work on the reconstruction of the kitchen. The rebuilding of the Stores has been completed, giving well-planned and roomy accommodation, and good progress has been made with the provision of refrigerating, cold and milk rooms in the basement adjacent to the Bakery. We understand that, when the reconstruction of the kitchen is finished, it is proposed to cease to use the present auxiliary kitchen in F.10 block and convert it into a Lecture Room.

We are glad to hear that a Visiting Room is being provided on each side of the Hospital, fulfilling a long-needed want.

There are to-day on the books the names of 1,567 patients, in the proportion of 629 men to 938 women. Of these one man and six women are at present on trial, leaving 1,560 patients in residence, including 32 voluntary patients and one temporary patient. Out-County patients number 14. Twenty female patients have been boarded out at Devon County Mental Hospital since last June.

Vacancies exist for 161 men by day and for 34 by night, while on the female side, if the 20 women return from Devon the prescribed accommodation would be fully occupied by day and there would be a deficiency of night space for 15 patients.

Direct admissions during 1935 totalled 309, of whom 56 (or 18.1 per cent.) were received as voluntary patients and 10 (or 3.2 per cent.) as temporary patients. Of the total direct admissions during that year just over 38 per cent. were received straight from their own homes.

According to the statistical returns furnished to us to-day only one temporary patient has been admitted during the course of the present year. Unless there are circumstances prevailing in this district which would render comparison with other areas misleading this figure cannot be regarded as other than most disappointing. We note further that only 26 patients have been admitted on a temporary basis since the Mental Treatment Act came into force. In all the circumstances we would urge that further measures should be taken to familiarise the general practitioners and relieving officers in the district with the procedure and the possibilities under Sec. 5 of that Act and, in this connection, would draw attention to Circular No. 805 which was issued by our Board in January, 1935.

We should like to have discussed the question of out-patient Clinics with Dr. Lowry. We are informed that the only clinic conducted in connection with this Hospital, which is held at the Hospital itself, is poorly attended, and that it is rare for more than one patient to be seen at a session.

Many useful alterations and additions have been made since our colleagues' visits in March, 1935, in addition to the main works of reconstruction mentioned above. These include a new semi-permanent building for use as an Upholsterers' Shop, improvement of the cloakroom facilities in female wards 1 and 4, the conversion of a woodshed into a brush-making room, and, amongst various other items, the provision of a nice type of locker in three of the female and one of the male wards. At present work is proceeding on alterations to the Mortuary and Viewing Room and an Occupation Pavilion, with accommodation for about fifty female patients, is being erected.

The wards on both sides are nicely furnished, and the ward gardens on the male side were well kept and bright with flowers. In the older parts of the building cloakroom accommodation is poor, and we wondered in many cases—for example in F.10 B—whether it could not be reorganised to give both better storage accommodation and room for coat-hanging fittings. The need for a convenient supply of hot and cold water in the sick dormitories, mentioned by our colleagues last year, still exists and we also endorse their remarks on the necessity for better facilities for cleansing utensils for sanitary, etc., purposes in many of the wards. We should like consideration given to the question of improving the bath and sanitary accommodation generally in the female infirmary (Ward 9).

The patients appeared contented. No complaints save on the score of detention were made to us and no private interviews were asked for.

The clothing generally seemed satisfactory. Special attention has been paid to the underclothing of the women and the garments of this nature now being issued are of modern and non-institutional type. All boots and shoes are made in the Bootmakers' Shop and fitted to the individual patient.

We were not altogether happy about the existing library arrangements. Owing to the reconstruction work new accommodation for the books will have to be found and we wondered whether advantage might not suitably be taken of this fact to reorganise the arrangements generally. In our view there is a general need for more books in the ward bookcases, our inquiries disclosing cases where patients who had read one book in the first few days after personally changing their books at the library, could not find another to their liking in the ward bookcase. Until recently the library arrangements have apparently been in the hands of one of the nursing staff who has now left, but we found it difficult to ascertain who was at present in charge of them. Would it not be possible to get the Chaplain or some other officer to undertake the organisation of the library? Such an arrangement works satisfactorily in many Hospitals and frequently it is found that a patient or two take great interest in giving assistance in indexing and distributing the books.

Two daily newspapers formed the average issue to the male wards but, with one exception, the issue to the female wards is restricted to one paper. The supply to these latter wards might, with advantage we think, be increased. No evening or Sunday papers are provided.

Some progress appears to have been made during the period under review in the organisation of Occupational Therapy, the range of hand work available for the women having been extended and further occupations provided for the men. We were glad, in addition, to see a few of the more chronic and deteriorated patients engaged in one or two of the wards in simple occupations such as shredding and envelope making. We are sure, however, there is still a large number of patients unemployed who would benefit from the provision of graded work of simple type.

So far as we were able to ascertain no provision is made for gymnastic exercises or physical training on either side of the Hospital. Our experience elsewhere leads us to believe that such activities are beneficial to the younger and introverted type of patients and we should be sorry to think that they are being dropped.

The patients are well catered for in the matter of indoor amusements, cinema shows, concerts, whist drives and dances forming a well-balanced and attractive programme during the winter. A considerable number

of patients enjoy the privilege of sitting up after the normal bedtime hour.

The death rate for 1935 was 6 per cent. (males 7 and females 5). Since the last visit there have been 143 deaths (males 56, females 87) followed in 58 cases by post-mortem examinations. The chief causes of death were Pneumonia (39), Senile Decay (21), Heart Disease (19) and Kidney Disease (13). Five inquests have been held—four in cases of patients dying shortly after sustaining fractures from accidental falls and one in the case of a patient who committed suicide by hanging. None of these five cases calls for comment.

Apart from an outbreak of a severe form of influenza affecting 44 patients in March and April of this year, the general health of the patients has been good. There have been no cases of enteric fever or dysentery. At present four men and five women are suffering from tuberculosis in active form and undergoing verandah treatment. At the time of our visit there were 43 men (*i.e.*, 6.8 per cent. of the total resident) and 112 women (*i.e.*, 12 per cent. of the total resident) in bed—the vast majority of the latter being bedridden on account of old age and debility.

During the period under consideration 22 fractures and one dislocation occurred among the patients. Of these 23 casualties 14 were due to accidental falls, 7 to patients being pushed down by other patients and two (minor fractures) to patients striking attendants. In 14 cases the age of the patient was over 50 years and in 9 cases over 60 years.

The nursing staff consists of 115 males and 147 female nurses, of whom 18 and 23 respectively are detailed for night duty. Just over 73 per cent. of the men and 19 per cent. of the women are certificated or registered as mental nurses. The latter figures are considerably below the average for all mental hospitals, but we note that in addition 33 of the remaining female nurses (*i.e.*, 22 per cent. of the total) have passed the preliminary examination. We inquired into the night nursing arrangements, which appeared to be satisfactory and to afford adequate supervision.

Dr. Lowry is assisted by five medical officers. The only change in this respect since the last visit being the appointment of Dr. N. Langdon-Down in place of Dr. Hannesson.

(Signed) FLORA CALDER,	} of the Board of Control.
Commissioner.	
CYRIL F. PENTON,	
Senior Commissioner.	

## APPENDIX V.

---

### REPORT OF COMMISSIONERS OF BOARD OF CONTROL.

---

SURREY MENTAL HOSPITAL.

NETHERNE.

*25th August, 1936.*

We have spent the whole of yesterday and to-day in our inspection of this Hospital, and, in general, have been very well satisfied with the condition in which we found it and with the care and attention bestowed upon the patients.

The buildings, apart from the need for ordinary redecoration here and there—which will no doubt be executed in the usual routine—were in good order. No major works of improvements or alteration have been carried out since the last visit except the erection of eight new staff cottages. We note amongst new work now in progress the provision of a hair carding machine and dust extractor.

There are at present on the books of the Hospital 1,526 patients, in the proportion of 576 men to 950 women, 45 of the former and 33 of the latter being voluntary patients. Seventy men and 63 women are classed as Private patients, of whom 40 males are “service or ex-service” patients. One man and ten women being out on trial, the total in residence yesterday was 1,515.

The Hospital is at present overcrowded to the extent of 60 women, both by day and night, but there are 14 vacancies on the male side. We hope that the arrangements in contemplation at Botleys Park and Clerk’s Croft will solve this problem of overcrowding at no distant date and also enable the children at the North Villa and Male Ward 5, to be removed to care better suited to their needs. Here they receive kindly care and attention, but lack the physical and mental training from which a certain proportion of them would benefit.

One of us who visited this Hospital in 1934 has been able to appreciate with satisfaction the progress made during the interval with regard to Voluntary and Temporary admissions. During 1935 approximately 22 per cent. of the total direct admissions were received as Voluntary patients, and nearly 10 per cent. as Temporary patients. These figures are, we believe, a little over the average for the whole country and pay tribute to the efforts made by all concerned with the administration of

the Mental Treatment Act in the area served by the Hospital. With regard to Temporary patients we note that 7, out of the total of 38 admitted in 1935, came direct to the Hospital from their own homes, the remainder being admitted through the Public Assistance Institutions. In this connection it is to be observed that while Epsom P.A.I. provided 22 Temporary patients in 1935, Kingston furnished only 5.

It has been a great pleasure to us to observe the advance that has been made in the organisation of Occupational Treatment since the Hospital was visited by Commissioners in September of last year. Two rooms, formerly used as Visiting Rooms, have been taken over to form a Male Occupation Centre and yesterday we found some 45 men engaged there in quite a good variety of useful and interesting crafts. On the Female side there is a small occupation centre capable of holding about 18 patients. In addition, we saw quite a number of patients engaged in rug-making and other occupations in the wards. The foregoing remarks indicate that a promising start has been made, on which Dr. Webber and his staff are to be congratulated, but much remains to be done. Two primary considerations appear to us to be of importance at this stage. The first is the appointment of an Occupation Officer on each side to develop the work in the centres, train the nurses and assist and supervise extension of the treatment to the wards on an organised basis. The second is the provision of further occupation centre accommodation in each division, without which we fear further progress will be difficult.

We should also like to see physical training developed to a greater extent than at present. We saw a male class of about 20 patients receiving training this morning, most of whom came from the Admission Hospital. The majority of them were wearing their ordinary clothes and we could not help feeling that gymnasium costume, which can be run up at very slight cost, would have been of advantage. We would add that we have reason to believe from what we have seen elsewhere that the introverted type of patient is capable of receiving a measure of benefit from activities of this type.

The wards generally were nicely furnished and comfortable and we were glad to see that an excellent supply of flowers was in evidence in the more disturbed wards on the female side. Two very nice little gardens are entirely looked after by patients and staff of the female wards to which they belong.

We discussed with Dr. Webber the desirability of providing hot water taps in the wards—one is a Villa—occupied by Private patients. This seemed to us especially desirable in the case of the ladies' residence.

Other points that struck us during our tour of the wards were the desirability of ventilating the toothbrush cupboards by means of holes bored in the woodwork and the provision of a fixed wash basin with hot and cold water in Male Ward 1.

Many of the suggestions made by our colleagues last year have received attention. Wireless, either by means of central installation or independent sets, is provided to every ward and individual marking has been inaugurated, commencing with the clothing of patients at the Admission Hospital.

So far as we could see, wherever it is reasonably possible, patients now have access to the sanitary annexes situated off the dormitories at night.

We found the patients generally very quiet and orderly in behaviour and uncomplaining. Although occupations have not yet been organised thoroughly in many wards it was interesting to hear from the nursing staff that much destructiveness and disorderly behaviour had been apparently checked by that form of treatment.

Much of the underclothing for both sexes provided by the Hospital is old-fashioned in type and we wondered whether it would be possible to supply garments of a less institutional type, at all events, to the better conducted wards.

A good deal appears to have been done recently to encourage the younger male patients to take part in active games. Teams composed entirely of patients play cricket weekly and to-day a cricket match against Croydon Mental Hospital was taking place, both sides being mainly formed of patients. Such activities are, we believe, much appreciated by patients and we hope the programme may eventually include games of football for the men and suitable ball games for the younger women.

The patients appear to be well catered for by way of indoor amusements and we are glad to know that members of the Medical Staff take great interest in organising entertainments for them. Char-a-banc rides to Worthing in the Hospital 'bus are a weekly pleasure to which many working patients look forward.

We were interested to hear that during the past few months a small party of local ladies has volunteered to visit patients on both sides of the Hospital. This public spirited effort on their part appears to be meeting with the success which it undoubtedly deserves.

We were pleased to find that the Library can now supply suitable and sufficient books, but we felt that a greater number of these might

have been actually in issue to the wards. We thought also that an increase in the number of weekly periodicals and pictorials supplied to the wards would be of advantage. It would be possible to keep the whole of the Library stock in good condition if bookbinding was included in the organised occupations. In making the above comments we hope that we shall not be taken as criticizing unfavourably the work of the Chaplain who we know takes so keen an interest in the library arrangements.

The dietary, which is full and varied, is on a four-weekly rotation of menu. Home grown fruit is supplied when in season, but we feel that provision might be made for the routine supply of fresh fruit, *e.g.*, oranges or bananas at tea-time throughout the winter. On both days of our visit we watched a good and nicely served dinner being partaken of by the patients, none of whom had any complaints regarding their general dietary.

The death-rate for the year ending December, 1935, was 6 per cent. (males 6.5, females 5.8). The number of deaths since the last visit has been 103 (males 43, females 60) followed in 67 cases by post mortem examination. The chief causes of death were: Senility (19), Heart Disease (18), Pneumonia (18) and Organic Brain Disease (11). Three inquests were held—two in the case of patients who committed suicide while on leave away from the Hospital and one in the case of a patient who sustained injury a year prior to admission regarding which an open verdict, in accordance with the medical evidence, was returned.

The general health of the patients has been good. There has been an entire absence of epidemic or zymotic disease in the Hospital. At present five patients (one male and four females) are suffering from tuberculosis in active form and are receiving open-air verandah treatment.

At the time of our visit there were only 41 male and 78 female patients in bed, *i.e.*, 7.3 per cent. of the total number in residence. The majority of these were bed-ridden on account of old age and debility. All were in receipt of skilled medical and nursing attention.

During the period under review there have been 16 serious, but non-fatal casualties. All were in the nature of fractures and with one exception, due to accidental falls. The exception was a patient who jumped from a window and broke both wrists.

We discussed with Dr. Webber the work at the Out-patient Clinic at Kingston Hospital. Forty-five new patients have made attendances since 1st January of this year and there appears to be no doubt that the work done is of considerable and increasing value.

We found an adequate nursing staff on duty during our visit to the wards and satisfied ourselves that the night-nursing arrangements were proper. Although no Night Superintendent has been appointed in either division, the arrangements for supervision seemed satisfactory.

There is an adequate staff of Visiting Specialists which now includes a Radiologist.

DUDLEY AUKLAND, Responsible Accounting Officer.

10th day of June, 1937.

I hereby certify that I have compared the entries in this Financial Statement with the accounts of the Local Authority relating thereto and that the regulations with respect to this Statement have been duly complied with.

I hereby further certify that I have ascertained by Audit the correctness of this Statement, and that the expenditure of the said Authority during the year ended the 31st March, 1937, included in this Statement and allowed by me at Audit is Two Hundred and Thirty-one Thousand and Fifty-one Pounds, Eighteen Shillings and Sevenpence Halfpenny.

As witness my hand this 19th day of June, 1937.

E. J. MILLER WILLIAMS,  
Asst. District Auditor.
